# M. Shebulan Joshwel

*Data Scientist Intern*

+94 76-801-9672 | jshebulan@gmail.com | https://www.linkedin.com/in/shebulan-joshwel/

## *Education*

**Sri Lanka Institute of Information Technology (SLIIT) – Malabe, Sri Lanka**

- *Bachelor of Science in Information Technology* *Specialized in Data Science* *July 2024-Present* **St. Benedict's College, Colombo**
- *G.C.E (A/L) Physical Science Stream* *B & 2S* *2020– 2023*
- *G.C.E (O/L)* *7A &2B* *2019– 2020*

## *Experience*

Data Analyst Intern

JAM – Mobile Monetization Company

September 2025 – Present (6 months completed,ongoing)

- Consolidated, cleaned, and validated datasets from Sri Lanka, Kenya, Jordan, Qatar, the UAE, and Nigeria, ensuring high accuracy and consistency for multi-country reporting.
- Transformed semi-structured JSON data into structured database tables, enabling reliable SQL querying and downstream analytics across regional datasets.
- Built and maintained Python + SQL automation scripts for recurring data preparation and KPI reporting, improving workflow efficiency and reducing manual processing.
- Developed a Python-based exchange-rate integration process for LKR, KES, JOD, QAR, AED, and NGN to standardize currency values for cross-country comparison.
- Designed interactive dashboards and analytical reports in Power BI and Excel to track business KPIs and support data-driven decisions across country teams.
- Collaborated with cross-functional stakeholders to deliver clear, insight-driven visual storytelling tailored to multi-market business needs.

***Key Skills:*** Data Cleaning, SQL, Python, Power BI, Dashboarding, KPI Tracking, Data Visualization, Documentation, Cross-functional Collaboration

## *Projects*

### Multi-Agent Stock Analysis & Trading Pipeline - CrewAI

·Built a CrewAI-powered multi-agent system that analyzes live stock data and makes trading decisions in real time.Analyst Agent  interprets market trends and Trader Agent recommends Buy or Sell. Integrated with Yahoo Finance API for live data, modular tasks, and reproducible workflows.

### LSTM Sentiment Classifier for Movie Reviews

·Built an end-to-end NLP pipeline that classifies movie reviews as positive or negative using an LSTM neural network. The project covers data ingestion and cleaning with Pandas, train/test splitting and preprocessing, tokenization and embedding layers, LSTM sequence modeling, and final dense layers for prediction. Implemented the model in Keras

### Autism Prediction Pipeline

· Built a machine learning pipeline to predict autism using multiple classifiers (Decision Tree, Random Forest, XGBoost). To ensure fair and balanced predictions, class imbalance was addressed using SMOTE (Synthetic Minority Oversampling Technique)

### Minecraft-style Sandbox Game in Python

· A playful Minecraft-style sandbox game built in Python using the Ursina engine.Features include WASD movement, Shift to jump, block placement with left click, and block destruction with right click. Gravity is intentionally infinite (fall endlessly) as a fun design choice — walls can be added if required. Created for experimentation with Ursina's first-person controller and block mechanics.

### Generative AI Chat-Bot

· Built a Generative AI Chatbot with Streamlit + LangChain Groq, featuring a sleek chat interface, persistent history, and realtime responses powered by the llama-3.3-70b-versatile mode

## Skills

**Programming**: Python, SQL, Java, R
**Tools & IDEs**: IntelliJ, PyCharm, Spyder, Jupyter Notebook, Google Colaboratory
**Data Analysis**: Pandas, Numpy, SciPy, TensorFlow, PyTorch
**Data Visualization**: PowerBI, Matplotlib , Seaborn

## Certificatons

Exploratory Data Analysis for Machine Learning – https://coursera.org/verify/5PXSJKHN39AO
AI/ML Engineer - Stage 1 - https://code.sliit.org/certificates/j8g6qkpxkh
AI/ML Engineer - Stage 2 – https://code.sliit.org/certificates/ww4kytw4o
