Professional Summary

Motivated and detail-oriented Machine Learning Engineer with expertise in Python, SQL, and C for data analysis, API integration, and system programming. Skilled in building scalable ML models, optimizing data pipelines, and deploying production-ready solutions. Recognized for evidence-driven troubleshooting, concise communication, and enterprise-grade dashboard design.

Core Skills

- Machine Learning: TensorFlow, PyTorch, Scikit-learn
- Data Engineering: PostgreSQL, MySQL, ETL pipelines
- Programming: Python, SQL, C
- Cloud & DevOps: AWS, Azure, GCP, Docker, Kubernetes
- MLOps: Model deployment, monitoring, scaling
- Communication: Slide-ready content creation, stakeholder summaries

Professional Experience

Data Intern – JAM *Fort Worth, USA*

- Built pipelines to migrate data from PostgreSQL to MySQL, ensuring seamless integration.
- Automated Excel maintenance and managed MIS operations for efficiency.
- Developed dashboards to support business decision-making with clear visual insights.

Board of Prefects Treasurer *SLIIT, Malabe, Sri Lanka*

- Managed finances for projects and events, overseeing budgeting and expenditure tracking.
- Coordinated funds for initiatives, ensuring transparency and accountability.

Education

- **Bachelor of Science in Information Technology** – SLIIT, Malabe, Sri Lanka *Specialized in Data Analysis, Highest Academic Honor Award*

- **Certified Data Science Professional** – Resume Worded Institute, Fort Worth, USA
- Studied English Literature, strengthening communication and analytical skills

Projects & Achievements

- Architected enterprise-grade dashboards for subscription and ad network modules.
- Designed modular schemas for analytics and reporting, improving scalability.
- Implemented FX rate integration using Currencylayer API for robust data warehousing.
- Debugged Django/Postgres environment setups, ensuring reliable credential loading.

Interests

- Scalable ML model deployment
- Elegant dashboard design
- Cost-effective migration strategies
- Hands-on troubleshooting and workflow optimization
